about us

At Virgo, quality is of utmost importance and we maintain the same in all the business heads of ours. We never compromise on quality and that is why we are recognized as indisputable leaders of laminate, plywood, aluminum, PVC and ACP. Apart from our adherence to quality, our 30 years long experience trail helps us deliver unmatched products to our customer. Be it laminate, plywood, aluminum products, for us, customers satisfaction is a barometer of our progress. In fact, we also focus on the overall development of society by favoring sustainable development. We are equivalently concerned about the environment, so we produced eco-friendly product that do not harm nature. We always stick to our ethos, value system and professionalism that fuel our spirit to serve the finest quality products. Right from picking up the raw materials to serving the final product, we observe all the standards of quality and safety due to which today, we have earned the market recognition of highest producer and exporter of laminates. We aspire hold this position for many more years to come by keeping on innovating and serving exactly the right products.

TECHNICAL SPECIFICATION

PROPERTIES		SPECIFIED VALUES AS PER IS:2046-1995	CONFIRMS
	Thickness	0.80 MM (±10%)	✓
	Resistance to surface wear	350 (Revolution)	✓
	Resistance to immersion in boiling water		✓
	- Mass increase (%)	10.0 (Maximum)	
	- Thickness increase (%)	11.8 (Maximum)	
	Resistance to dry heat 180°c	Not Worse then 4	✓
	Dimensional stability at deviated temperature		✓
	- Longitudinal (%)	0.550 (Maximum)	
	- Transverse (%)	1.025 (Maximum)	
	Dimensional stability at 20°c		✓
	- Longitudinal (%)	0.375 (Maximum)	
	- Transverse (%)	0.600 (Maximum)	
	Resistance to impact by small diameter ball	20N Minimum	✓
	Resistance to cracking	Not worse then 4	✓
	Resistance to scratching	2N Minimum	✓
	Resistance to staining	Not worse then 5	✓
	Resistance to color change (wool standards)		✓
	- In xenon are light	Not worse then 6	
	- In enclosed carbon arc light	Not worse then 5	
	Resistance to cigarette	Not worse then 3	✓
	Resistance to steam	Not worse then 4	✓
	Appearance	Should be free from foreign particles	✓

LIMITED WARRENTY

- Kindly check the sheet in all aspects after purchasing & prior to cutting.
- In case of mfg. defects, only replacement of used sheet will be made
- No warranty for corner crack or air bubble.
- No claim will be entertained thereafter in any case of the specifics

LAYING INSTRUCTIONS

- Before Use ensure that the Surface or plywood and laminates is clean, dry, levelled and free of oils, excess moisture or other contaminants, such as dust, synthetic particles, etc.
- Only Use White PVA Adhesive to stick the sheets. Apply Double Layer of Adhesive on Edge (Min. 3-4 Inch) of Both The Surfaces.
- The adhesive should always be Stirred before use. Sufficient adhesive should be applied on both of the surface. Don't add water into the adhesive, it makes the bonding weak.
- Once adhesive applied is thickly in nature (usually requires 5-10 minutes, depending on atmospheric conditions), the laminate should be placed on the surface, accurately aligned.
- Sufficient bonding procedure to ensure intimate contact necessary for an adequate bond should be applied over the entire area using as much as procedure as possible without damaging the assembly.
- Pinch rollers(rotary press) and heavy weighted rollers are ideal. Hand rolling should be done from the canter to the edges to ensure the removal of air bubbles. The edges should be rolled twice.
- For satisfactory bonding, the pasted sheet area should be kept under pressure for 12-18 hours (depending on climate).
- In rainy season or when humidity is too high, moisture may-condence on the surface during drying (Know as "blushing")and will prevent an acceptable.
- Hot spray or forced air drying may be used to help prevent this condition.
- It is recommended that the max sheet size used for vertical field application be limited to 610x240 mm (2x8 ft.).
- When Laminate is pasted vertically, maintain uniform pressure on all sides till adhesive is dried.
- To avoid stress cracking, avoid making cut outs having sharp corners and rough edges.
- A gap of minimum 2mm should be maintained between two laminates while pasting side by side.
- Due to transportation limitations laid the laminate sheet on flat surface in between 2 plywood sheets for minimum 48 Hrs.
