VIRGO®

A DIVERSIFIED CONGLOMERATE WRITING STORIES OF SUCCESS

The Virgo Group of companies constantly looks out for innovation and challenges in the industry. Across all its group companies, it maintains a philosophy of reaching out to perfection, no matter what it takes, whether high-end resources or a superlative manpower. With a team size of over 3000+ employees, Virgo Group's employees spread all across the nation are working together in a rewarding environment to achieve the objectives the company was founded upon. Long before, government-issued regulations concerning the protection of the environment, Virgo Group had already invested in "Environment Friendly" initiatives. These included reforestation programs and elimination of the use of tropical woods and harmful, ozone-damaging chemicals. Weighing its actions on a philosophical pedestal, Virgo today has evolved into a dynamic group that has been generating optimum profit through total satisfaction of customers, suppliers, employees and society.

Installation Process / Steps

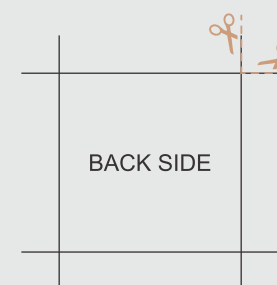

STEP - 1

CUT YOUR SHEET AS PER YOUR DESIRED DIMENSIONS

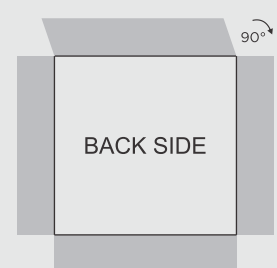

STEP - 2

USE V-GROOVE CUTTER TO MARK A GROOVE (TO BEND) ON THE SHEET

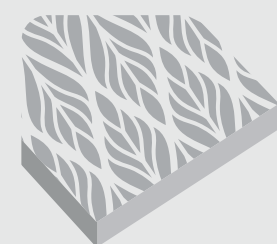

STEP - 3

NEXT USE A REGULAR PAIR OF SCISSORS AND TRIM THE EDGE OUT

STEP - 4

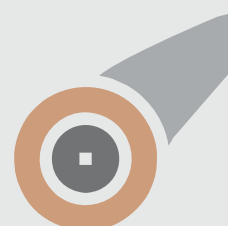

PLACE THE SHEET FRONT UP AND USE THE GROOVE MARKS TO BEND THE SHEETS TOWARDS OUTSIDE

STEP - 5

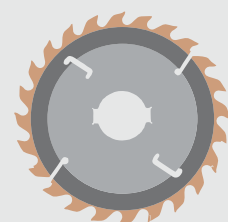

NOW YOUR SHEET IS READY TO BE USE

Tools / Devices to be Used

DIAMOND CUTTER BLADE

For cutting, routing and drilling, we only recommend using a diamond cutter blade. To avoid any burrs during cutting ensure all the blades are sharp. A smooth file can be used to feather all the corner edges.

CIRCULAR SAW BLADE

A 4"x8mm x 6 Tee Radius C - groove blade should be used for bending Virgo PVC laminates. The recommended groove depth is 0.8 mm & width 5 mm or more. Routed sheet will easily bend up to 90°.

PVC LAMINATES?

Laminates made with matching layers of colors throughout are called color core laminates. These laminate sheets are mostly used to eliminate the dark seams, which appear on the edges & joints of regular laminates. Color core laminates are known for the consistent, edgeless, and seamless look they give to furniture. Our color core range is available in Glossy and Matt finishes with a wide range of vibrant color options to choose from. The application potential of color core laminates is as vivid as your imagination. Apart from the basic applications, these surfaces are ideal for every space as these are highly functional and durable. These surfaces also resist scuff marks, scratches and stains under normal use.

90°

CC

90 DEGREE BENDABLE

YOU CAN SAY A REAL EDGE LESS COLOR CORE

PVC laminates are **90 degree bendable**, which means it can be folded and bended up to 90 degrees and easily applied at the edges too. With this simple bending technology, these laminates can give your furniture a smooth and seamless edge and also a **colour core** look and feel. so those edgy and sharply visible joints will never ruin the aesthetics of your kitchen cabinets or any other furniture.

TECHNICAL SPECIFICATIONS

THICKNESS: 1.2 MM , +- 10% Standard

SHEET SIZE: 1220 MM X 2440 MM (Standard)

SIZE OPTIONS: **Length:** Any [On Request] **Width:** Up to 1220 mm

RANGE: Our PVC Laminates are available in a variety on range. Customized sizes & shades can be developed on request.

ADHESIVE: These laminates are easy to apply with the standard laminating system, including most of the conventional adhesive normally used with plastic laminates such as many water based and solvent based. We do not recommend the use of heat activated adhesives.

LAMINATES: Proper substrates must be used and careful bonding procedure must be observed. Substrates should be of good quality of plywood, high density practical board, high quality fiber board or PVC board. The face of substrates must be smooth or free of grease, wax, dust, chips and other foreign matter.

We do not recommend use of PU base, melamine, lamination (wax) on our laminates. the application of these will spoil the originality and natural beauty of High Gloss PVC Flexible Sheets.

CUTTING & INSTALLATION : These High Gloss PVC Flexible Sheets can be cut, routed and drilled with most standard wood working too, or equipments. All blades must be Sharp to remove any burrs that may occur in the cutting process. We recommend the use of a leather to smooth all corner edges.

BENDING & FORMING : These laminates can be bent and all radius bending should be handled in the same manner as all grades of non post forming decorative laminates. Use only V- Groove cutter to bend the sheets at 90 degree. In case of any difficulty please contact us.

MAINTANANCE : Any cleaning agent containing acids, alkalis or abrasive should not be used to clean the High Gloss Flexible Sheets. We recommend to use only clean water for cleaning of sheets.

NOTE: Virgo warrants that all its products are free from manufacturing defects and perfectly ideal for use in normal conditions. In any case of claim, the liability of the company is only limited to the cost of the product only. This may be color variations from batch to batch. The sample swatches in the catalogue represent the design, colours and ruches. They do not present at the Actual sheets.

CARE AND MAINTANANCE

As aforementioned, PVC laminates are easy to clean and maintain. But for a healthy and longer life of the laminate, you need to follow the basic dos and don'ts during its maintenance.

DOs

- Always prefer diluted mild liquid detergent or organic cleansers for cleaning
- Use soft damp clothes for wiping
- Wipe off the spills immediately, if they happen.
- Treat any difficult stains with a mixture of water and baking soda
- Dry clean the surface after cleaning to prevent marks or spots

DON'Ts

- Avoid cleaning agents containing acids or any harsh chemicals
- Avoid cleaners that leave behind a soapy residue
- Avoid excessive scrubbing as it can damage the surface
- Avoid abrasive cleaning tools like steel scrubbers, knives or any sharp objects, as they can leave scratch marks on the laminate surface

KINDLY REMOVE THE PROTECTIVE FILM WITHIN 7DAYS OF INSTALLATION OF LAMINATES
